GEMÜ® VALVES, ACTUATORS
AND CONTROL SYSTEMS

PHARMA, FOOD AND BIOTECH PRODUCTS

Biotechnology and pharmaceutical industries demand maximum performance from our valves as only 100% process safety and integrity is acceptable.

These industries deal with foodstuff, which we consume daily, or manufacture pharmaceutical products and medicines which serve our health.

New vaccines are developed and new substances are produced which are designed to safeguard the future of mankind. Any mishaps in the processes could have fatal consequences. Our valves are used for

processing the most

precious of liquids, one drop of which may cost a small fortune.

GEMÜ guarantees the safety of our products. Therefore we are the consumers' first choice for aseptic valves of uncompromising quality.

Considerable investments, e.g. in 5-axis simultaneous CNC machines with CAD connection, were necessary to achieve such a performance capability. These machines produce

GEMÜ M600 multi-port valves where all the valve weirs and cross connections are integrated "into one component".

These features save our customers costs and enable us to guarantee the highest possible service reliability.

GEMÜ - "THE ENGINEERS CHOICE"

Diaphragm and globe valves in stainless steel
 Autoclavable, aseptic, almost deadleg-free
 Surface finishes down to Ra 0.25 µm, electropolished
 Straight through and multiport valves, valve manifolds
 EPDM, FPM, PTFE diaphragms and seals

Manual, pneumatic or motorized actuators
 Nominal sizes DN 2 - 100
 Measurement, control and regulating devices
 for pressure, temperature, level and flow rate
 Integrated field bus connections

GEMÜ® VALVES, ACTUATORS
AND CONTROL SYSTEMS
